

INDUSTRIAL AI

TWO-DAY TRAINING

AI POWERED PREDICTIVE FACTORY

BRIDGING THE GAP BETWEEN TECHNOLOGY AND MANUFACTURING

INDUSTRIAL AI REAL APPLICATIONS

ONLINE | 16-17 OCTOBER

Since 2014, MIPU Predictive School helps professionals and corporate teams develop key skills in order to make the operations of companies and organizations more effective and efficient.

We operate in Italy, Spain, South Korea, Switzerland and Romania, with more than 200 clients from various industries.

This is the ninth edition of MIPU Predictive Days, an event focused on experiential training, collaborative learning and networking, dedicated to predictive maintenance and Artificial Intelligence.

INTRODUCTION TO INDUSTRIAL AI

- Why is AI relevant for your business?
- How is AI changing our daily routine and operations?

Discover how AI is reshaping the industrial world. This course covers why AI is crucial for your business and how it's revolutionizing daily operations and workflows. Learn how to leverage AI to boost efficiency, enhance decision-making, and stay competitive in today's market.

**17th
OCTOBER**

INDUSTRIAL AI REAL APPLICATIONS: HOW TO REACH YOUR BUSINESS GOALS?

- Do I have enough data? How to use the available data? What if I don't have historical data? How can AI help me?

We are going to explore and go through different strategies to succeed in creating value with AI in your company by analyzing real case studies. During this course you'll dive into real-world examples, discovering strategies to effectively implement AI and create tangible value, regardless of your data situation.

WHO IS IT ADDRESSED TO?

Production managers and plant managers

Technical directors

Operations managers / specialists

Innovation managers

IT specialists/managers

Process managers / engineers

Energy managers

Data Analysts

“

We have participated in the training courses of MIPU. During the last event, we took part in a business game I-Plan, focused on maintenance planning & scheduling. It was a surprisingly very efficient experience and practical training, in which some of us took part but I wished my entire maintenance team had taken part in.
